Biology and Philosophy (2006) 21

Contents of Volume 21

Volume 21 No. 1 January 2006

MASSIMO PIGLIUCCI / Genetic variance–covariance matrices: critique of the evolutionary quantitative genetics research program 1–23

J.R. STONE and B.K. HALL / Review article – A system for analysing features in studies integrating ecology, development, and evolution 25–40

BERND ROSSLENBROICH / The notion of progress in evolutionary biology – the unresolved problem and an empirical suggestion 41–70

W. HINZEN / Spencerism and the causal theory of reference 71–94

R. ARP / The environments of our Hominin ancestors, tool-usage, and scenario visualization 95–117

MEHMET ELGIN / There may be strict empirical laws in biology, after all 119–134

Book reviews

EVA JABLONKA and EYTAN AVITAL / Animal Innovation: The Origins and Effects of New Learned Behaviours 135–141

EVA JABLONKA / Genes as followers in evolution – a post-synthesis synthesis? 143–154

Volume 21 No. 2 March 2006

Area review

MATTEO MAMELI and PATRICK BATESON / Innateness and the sciences 155–187

ANDREW PACKARD / Contribution to the whole (H). Can squids show us anything that we did not know already? 189–211

SCOTT WOODCOCK / The significance of non-vertical transmission of phenotype for the evolution of altruism 213–234

THOMAS PRADEU and EDGARDO D. CAROSELLA / The self model and the conception of biological identity in immunology 235–252

R. NORTHCOTT / Causal efficacy and the analysis of variance 253–276

Book reviews

DEREK TURNER / The Progress of Darwinism 277–285

BRUCE H. WEBER / The Past Illuminates the Present 287–298

STEPHEN M. DOWNES / Book Review 299–307

Volume 21 No. 3 June 2006

KIRK FITZHUGH / The 'requirement of total evidence' and its role in phylogenetic of systematics 309–351

DONALD H. COLLESS / Taxa, individuals, clusters and a few other things 353–367

MILAN M. ĆIRKOVIĆ / Too early? On the apparent conflict of astrobiology and cosmology 369–379

Book Reviews

JOSEPH LAPORTE / Species as relations: examining a new proposal 381–393

JAY ODENBAUGH / Struggling with the science of ecology 395–409

TIM LEWENS / Flagellant Priests 411–421

INGO BRIGANDT / Philosophical issues in experimental biology 423–435

MICHAEL RUSE / The evolution of the philosophy of biology 437–442

B. FRASER / Review of Neil Levy, What Makes us Moral? Crossing the Boundaries of Biology 443–452

Volume 21 No. 4 September 2006

Articles

TADEUSZ WIESLAW ZAWIDZKI / Sexual selection for syntax and kin selection for semantics: problems and prospects 453–470

RASMUS GRØNFELDT WINTHER / Parts and theories in compositional biology 471–499

STUART KAUFFMAN and PHILIP CLAYTON / On emergence, agency, and organization 501–521

P. KYLE STANFORD / Francis Galton's theory of inheritance and the problem of unconceived alternatives 523–536

LEO HELLERMAN / Representation of living forms 537–552

Discussion

PATRICK BATESON / The Nest's Tale. A reply to Richard Dawkins 553–558

Book Reviews

MATTEO MAMELI and DAVID PAPINEAU / The new nativism: a commentary on Gary Marcus's *The birth of the mind* 559–573

ALAN C. LOVE / Taking development seriously: who, what, when, where, why, how? 575–589

KAREN NEANDER / Moths and Metaphors. Review Essay on Organisms and Artifacts: Design in Nature and Elsewhere by Tim Lewens 591–602

Volume 21 No. 5 November 2006

Special Issue: Richard Levins' Philosophy of Science
Guest Edited by Michael Weisberg

Articles

MICHAEL WEISBERG / Richard Levins' Philosophy of Science 603–605

JAY ODENBAUGH / The strategy of "The strategy of model building in population biology" 607–621

MICHAEL WEISBERG / Forty Years of 'The Strategy': Levins on Model Building and Idealization 623–645

JAMES JUSTUS / Loop analysis and qualitative modeling: limitations and merits 647–666

WILLIAM C. WIMSATT / Aggregate, composed, and evolved systems: Reductionistic heuristics as means to more holistic theories 667–702

RASMUS GRØNFELDT WINTHER / On the dangers of making scientific models ontologically independent: taking Richard Levins' warnings seriously 703–724

PETER GODFREY-SMITH / The strategy of model-based science 725–740

RICHARD LEVINS / Strategies of abstraction 741–755
